TORX PLUS®

Parallell anläggningsyta mellan verktyg och infästning ger större kontaktyta, minskad stress samt tjockare gods i vingarna, jämfört med en konventionell Torxprofil. Detta gör att Torx Plus verktyg slits mindre, klarar betydligt högre moment, sitter säkrare i skruven samt minskar risken för skador och slitage på infästningen.

OBS! Torx Plus verktyg passar inte i vanliga Torx skruv.

Torx Plus® är ett registrerat varumärke från Acument Intellectual Properties, LLC
